I am rejoiced that I can at least say, the lands which may be selected by the Governor of your state, under the supplementa-ry to be act providing for the admission of Michigan, will be reserved from public Instructions to that effect have, I understand, been given to the different offices within the peninsula of Michigan. These ands, however, will not be considered the erty of the state until after its admison into the Union.

From the New-York Courier & Enquirer. Cholera at Charleston .- We are sorry to see by the Charleston Patriot of the 27th ult. that this frightful pestilence is on the increase in that city; the number of cases on that day amouting to forty four. The number on the day previous was thirty four. This, for the population of Charleston is e-qual to between three and four hundred cases for the city of New-York, and exhibits a pestilence quite as severe in its rav-ages, as that of 1832 in this city.

The Detroit Affair .- The story that went the newspaper rounds, of a renconter between Gov. Mason, of Michigan, and Gen. Boynton, of Ohio; so often contradicted, and so often reaffirmed, finally turns out to have had no other foundation than the foolish boasting of Boynton. He had been to Detroit, and on returning to Cleveand, himself promulgated the falsehood, that he had met the Governor in mortal combat. The editor of the paper that first gave credence to the General's boastings, finally acknowledges the untruth of the whole statement.—Niagara Democrat.

Hurricane.—On Saturday last, a hurri-cane or whirlwind passed over a section near the centre of the town of Volney, in this county, which did much damage to property, and caused the death of a young man named Sidney Wise, aged about 16 years. He was passing with a jug through a field over which the whirlwind passed, and was found senseless, after the storm. From the jug being found about fifteen rods from the fence in the direction from which the wind came, it is presumed he was taken up by
the force of the wind, and thrown with
violence against the fence. He was so severely bruised as to survive but a few hours.
In its course, the whirlwind came in contact
with the dwelling houses of Mr. Solomon
Siscoe, and Thomas More, both of which Siscoe, and Thomas More, both of which

Count Surveillers, or as he is more republicanly denominated in this country, Jo-SEPH BONAPARTE, will return to the United States, and probably next spring, having given orders as it is said, to have his icehouse filled, and the other affairs of his place at Bordentown put in readiness for him, so that he may enter upon its occupation immediately. If this be so, it was mere gossip to say, as was said when he sailed for Europe, that he did so without any intention to return to America .- Cour. 4

Fire in New York .- The "Congress Sugar Refinery," a six story building, running from Duane to Reade street, near Chapel, was burnt on Thursday morning, Constantine, Oct. 12. JOHN S. BARRY. Extract of Sarsaparilla.

I cannot but express my highest sense of gratification in the result this excellent preparation has had in the cure of Cutaneous Diseases. In every case which has come under my practice, it has had the most complete success. Not one-even the most obstinate and long standing—but has received a permanent cure from this very extensive the compound. In a section of counter the cellent compound. In a section of country like this, where the principal diseases arise from a vitiated state of the blood, I think the introduction

of your preparation will be of the most eminent strice.

I consider it the neatest preparation of sarsaparilla I have ever mot with, and as such I unhesitatingly give it my earn at recommendation.

Truly yours, ec.

VALUABLE SCHOOL BOOKS.—
THE AMERICAN CLASS READER: containing a series of lessons in Reading; with Introductory Exercises in Articulation, Inflection-Emphasis, and the other essential elements of correct naturel Elecution: designed for Acadamies and common Schools. By George Wilson, formerly Principal of the Canandaigua Academy, and late Principal of the Livingston Co. High School.

The design of the American Class-reader, is to teach scholars to read. It is not sufficient for this purpose, that a book be instructive and entertaining, and the selections chasts and classical in point of diction; it should be also properly adapted to exercise the reader in all the varied tones, inflections, and other requisities that belong to correct

tions, and other requisities that b.long to correct

Four lessons are inserted without punctuation. These will furnish tests of the degree of intelligence, and of attention to the sense, with which the pupil reads. They may also be used in teach-

no pupil reads. In y may also be used in teaching punctuation, and the use of capitals.

A considerable number of lessons have been selected from the Bible. Apart from the importance and value of its divine instructions, the Sacred Scriptures abound in presuges unrivalled in natural impressive eloquences, and admirably danted to the nursees of impressyment in elega-

in natural impressive eloquence, and admirably adapted to the purpose of improvement in elocution. In what is call drhetorical dialogue, selections can no whereelse be found at all coopy rable.

A PRACTICAL AND THEORETICAL SYSTEM OF ARITHMETIC, containing several n.w.methods of operation, and a new system of Proportion; with Theoretical explanations of all the principal rules. Also, a treatise on Mansuration, and a brief practical system of Book-keeping. By the author of the American Class Reader.

["This system of Arithmetic is designed for the more advanced papils in common Schools and Academics. It does not attempt to combine men-tal arithmetic with the use of the slate, nor to untal srithmetic with the use of the slate, nor to units in one book a treatise for children of six, and for youths of sixteen years old. In mental srithmetic, every thing that could be desired, has been done by Colbura whose admirable little work is now so generally used and highly appreciated throughout the United States."]

Canandatous, July 1, 1836.

Mr. Morse:

Sir—H wing carefully examined "The American Class-Reader," by George Wilson, I he sixte not to express my opinion decidedly in its favor; becaused doesn it a work chaste in its selections, classical in point of diction, and admirably calculated to assist youth in becoming correct readers. I hope that it will be universally adopted in our schools.

I have also examined your "Practical and Theo. ratical Arithmetic," by the sime author, containing several new methods of operation, and a new system of proportion; and hesitate not to say, that it is the best work I have seen of the kind.
